SUMMARY

Fourth-year Computer Engineering student with a strong interest in Artificial Intelligence and full-stack development. I bring a creative approach to building intuitive and user-centric web applications, combining technical skills with innovative problem-solving to deliver clean, effective solutions.

EDUCATION

SVKM's NMIMS, Indore <i>B.Tech – Computer Engineering (Coursework: Data Structures, OOP, DBMS, OS, Computer Networks)</i> N.S. Sanghvi School <i>Class 12 (State Board)</i> Vatsalya Public School <i>Class 10 (CBSE)</i>	Jul 2023 – May 2027 CGPA: 2.84/4.00 2021 – 2023 Score: 74.5% 2015 – 2021 Score: 85%
---	--

TECHNICAL SKILLS

Languages: Python, Java, C++
Web Development: FastAPI, Flask, Next.js, React, HTML, CSS, Flutter
AI/ML: scikit-learn, pandas, NumPy, NLP
Databases: PostgreSQL, Supabase
Tools: GitHub, Render, Vercel, MATLAB, Power BI

PROJECTS

SmartSubmit — SaaS Platform Integrating Google-Classroom with Personalized Dashboards <i>FastAPI, React, PostgreSQL, Supabase, Google OAuth 2.0</i> – Architected a full-stack SaaS platform using FastAPI and React backed by PostgreSQL on Supabase, supporting 50–150 lightweight API requests/sec on standard deployment. – Diagnosed and resolved a multi-layered OAuth 2.0 + CORS failure within 2 days by tracing origin mismatches, correcting FastAPI credential headers, and stabilizing the OAuth callback flow. – Onboarded 12 beta users and deployed to Render and Vercel, configuring production-grade redirect URIs and async request handling for real-world usage.	Feb 2026 <i>Live Demo</i>
Brainwave — AI-Powered Global News Intelligence Platform <i>Next.js, Three.js, React Three Fiber, Hugging Face Transformers</i> – Built a 3D news visualization platform ingesting 500–2000 articles/day with real-time clustering and topic grouping across global sources. – Integrated Hugging Face BART summarization model, reducing average article reading time by ~70% as measured via pre/post user surveys. – Optimized the end-to-end article processing pipeline from 4–6 seconds to 1.5–2.5 seconds per article by parallelizing summarization and eliminating redundant API calls.	Apr 2025 <i>Live Demo</i>
SkillScan.AI — AI Resume Screening & ATS Analyzer <i>Python, Flask, NLP, Google Generative AI API</i> – Built an LLM-powered resume screening platform evaluated on 100+ resumes, delivering ATS compatibility scores and analysis. – Implemented contextual job-role alignment using Google Generative AI API, achieving sub-1-second response times for real-time resume evaluation. – Designed and deployed REST APIs with Flask on Render, enabling end-to-end resume analysis.	Jul 2025 <i>Live Demo</i>

EXPERIENCE

Kylient Software Solutions <i>Full Stack Developer Intern</i> – Working on AI-powered features and automation workflows to improve application functionality and user experience.	Jun 2026 – Present
Sewa Bharti – India <i>Community Development Intern</i> – Supported education and rural development initiatives by organizing learning programs and community outreach activities.	May 2024 – Jun 2024

LEADERSHIP ROLES

Google Developer Student Club <i>Team Lead – Photography</i> – Led media operations for 10+ technical events, delivering promotional and documentation content for community outreach.	Aug 2025 – Present
Turing Club, NMIMS <i>Member</i> – Participated in competitive programming sessions and algorithmic problem-solving workshops.	Sep 2024 – Aug 2025

CERTIFICATIONS

- Supervised Machine Learning: Regression & Classification – Stanford University
- AI Agents Fundamentals – Hugging Face
- Python for Data Science, AI & Development – IBM
- Data Analysis and Visualization with Power BI – Microsoft
- Claude 101 – Anthropic

EXTRACURRICULAR

National Level Table Tennis Player.
